Description

Bio Cleaner Textile cleans on a biological basis, removes stains and neutralizes odors. A useful and long-lasting bacterial flora remains that improves the biological breakdown of organic matter, such as mite excrement, continues.

technology

The technology used is based on the combination of easily biological biodegradable surfactants, active fermentation extracts and micro-organisms. The precisely matched ingredients ensure exceptional cleaning results and completely eliminate the use of acids and bases. bee*pure® biological cleaners are pH neutral. The fermentation extracts work on the impurities and dissolve them. The micro-organisms provide deep cleaning of hard-to-reach areas and remove unpleasant odors at the same time.

components

5-15% non-ionic surfactants, <5% amphoteric surfactants substances, enzymes, bacterial cultures, perfume, preservatives. For more information please refer to the technical data sheet. Enter residual materials environmentally friendly manner at recycling companies. EUH208 - Contains a mixture of: 5-CHLORINE-2-METHYL-2HISOTHIAZOL-3-ONE and 2-METHYL-2H-ISOTHIAZOL-3-ONE (3:1). May cause allergic reactions.

dosage

1:50 to remove stains.

1:100 to 1:200 for cleaning carpets and upholstery.

Dilute with cold water. Use distilled water for stain removal and on delicate fabrics.
