

## ***Nano EcoLine AddShine – Professional Additive for glass or other smooth surfaces***

Product Description (CM.ASSSHINE/1 LT)

Nano EcoLine AddShine is a professional rinse aid that ensures streak-free, clean, and shiny surfaces. This high-quality product was specially developed for the cleaning industry and works exceptionally well on glass, plastic, metal, and painted surfaces.

Thanks to advanced nanotechnology, an ultra-thin protective layer is created that reduces re-contamination and guarantees long-lasting shine.

AddShine works best when combined with reverse osmosis water. It is suitable for hand washing or in window cleaning systems.

The formula is biodegradable and free from harsh chemicals, making it a sustainable choice.

### ***Key Features***

- Faster drying surfaces – no subsequent drying required
- Streak-free result – leaves no residue
- Dirt-repellent effect – prevents rapid re-contamination
- Time saving – fewer actions required
- Very economical in use – 1 litre = 50 litres of solution
- Biodegradable – sustainable and safe for the environment
- Free from harsh chemicals – safe for user and surface
- 

### ***Applications***

Nano EcoLine AddShine is suitable for:

- Glass and frames
- Plastic facade panels
- Solid surface
- Metal surfaces
- Doors, windows and other non-porous surfaces

### ***Benefits for window cleaners***

- Ensures faster drying windows without spots or streaks
- Improves the shine of glass and frames
- Dirt-repellent effect thanks to nano-technology
- Time-saving: no rinsing or drying required
- Very economical in use – 1 litre = 50 litres of solution

### ***Instructions for manual window cleaning;***

Nano EcoLine AddShine is an advanced additive for reverse osmosis water that ensures a streak-free, shiny finish on glass and other smooth surfaces. Ideal for professional window cleaning.

### ***Mixing ratio***

Add 200 ml Nano EcoLine AddShine to 9.8 litres of clean water (preferably osmosis water).

This corresponds to a ratio of 1:49 – from 1 litre of product you get 50 litres of ready-to-use solution.

### ***Usage***

Add the diluted mixture to your bucket, water tank or reverse osmosis system.

Suitable for use with tucker poles, brushes, wash-in devices or spray units.

No rinsing required

Simply let the surface dry. The product won't leave streaks or residue.

### ***Storage and shelf life***

Store in a cool, frost-free place

Shelf life: at least 12 months in closed packaging

### ***Safety***

Avoid contact with skin and eyes.

Wear gloves and protective clothing when using

Ensure adequate ventilation
