Description

Bio Odor Remover Universal is an extraordinarily powerful, biotechnological odor remover that neutralizes bad odors and eliminates their cause.

technology

The technology used is based on competing bacterial cultures specifically formulated for the rapid decomposition of organic matter.

A key feature of these cultures is their rapid growth and colonization of the treated areas before malodorous microbial species can decompose the organic material and cause bad odors.

Components

<5% non-ionic surfactants, bacterial cultures, perfume, preservatives.

dosage

Ready to use.

For professional use only.

scope

Bio Odor Remover Universal is ideal for use in garbage compactors, trash cans, garbage trucks, etc. It is also excellent for any type of surface on which liquids, feces, or vomit have left unpleasant odors.

Instructions for use

Manual application for surfaces, garbage and other waste materials:

1. If necessary, thoroughly clean the surfaces to be treated.
2. Spray the entire foul-smelling surface.
3. Repeat the process as needed.
