

INORGANIC

Description

Bio Cleaner Inorganic removes stubborn stains, cleans and degreases quickly and thoroughly clean all surfaces in schools, sports facilities, commercial institutions, industrial installations, offices, workshops, etc.

technology

The technology used is based on the combination of easily biological biodegradable surfactants, active fermentation extracts and micro-organisms. The precisely matched ingredients ensure exceptional cleaning results and completely eliminate the use of chemical acids and bases. bee*pure® Bio Cleaner Inorganic is pH neutral. The fermentation extracts work on the impurities and dissolve them. The micro-organisms provide deep cleaning of hard-to-reach places and simultaneously remove unpleasant odors.

components

5-15% non-ionic surfactants, <5% amphoteric surfactants substances, enzymes, bacterial cultures, dyes, perfume, preservatives. For more information, see the technical data sheet. Feed residual materials environmentally friendly manner at recycling companies. EUH208 - Contains a mixture of: 5-CHLORINE-2-METHYL-2H-ISO-THIAZOL-3-ONE and 2METHYL-2H-ISOTHIAZOL-3-ON (3:1). May cause allergic reactions.

dosage

1:100 to 1:300. Dilute with cold water.

The hardness of the water can influence the required dosage.

For professional use only.
